

THERMAL SIGHTS

IdentifieR SERIES

THERMAL SIGHTS

IdentifieR Series is the special operations, military and law enforcement professionals' choice to enhance operational effectiveness and precision.

The long range performance capabilities of up to 1550 m / 2600 m is ideal for complex combat situations and most sniper applications.

The video output and the serial communication interface enable remote operation and provide a video signal for external viewing or recording, ideal for remote surveillance activities or military training.

The MIL-STD-1913 Picatinny mounting provides compatibility to a wide range of assault rifles and light machine guns and user needs (e.g. left and right handedness).
